PROFESSIONAL SUMMARY

Computer Science undergraduate focused on cybersecurity, software development, and system security. Hands-on experience with phishing detection, vulnerability assessment, network analysis, Linux, and security tooling. Strong foundation in reconnaissance, web security, networking, and problem solving; seeking opportunities to contribute to security engineering and software development teams.

CORE STRENGTHS

- Analytical Problem Solving
- Critical Thinking
- Teamwork & Collaboration
- Communication
- Leadership
- Time Management

LANGUAGES

- English — Fluent
- Hindi — Fluent

TECHNICAL SKILLS

Security Tools: Nmap, Wireshark, Metasploit, Netcat, Linux CLI

Networking: TCP/IP, OSI Model, DNS, DHCP, Subnetting, Ports & Protocols, Traffic Analysis

Operating Systems: Windows Administration, Linux CLI, File Systems, Permissions, User Management

Cybersecurity: Vulnerability Assessment, Reconnaissance, Web Security Fundamentals, Security Analysis

Web Security: URL & Domain Analysis, Form/DOM Analysis, Brand Impersonation, Unicode Lookalikes, Explainable Risk Scoring

PROJECTS

PhishGuard —
Phishing Detection Browser Extension

[GitHub](#)

Privacy-first browser extension for real-time phishing detection using URL, domain, form, brand-impersonation, and Unicode lookalike analysis. Generates an explainable 0–100 risk score with human-readable security reasoning.

EDUCATION

Bachelor of Science in Computer Science

Thakur Shamnarayan Degree College

GPA: 9.36 (No Active ATKT)

2024–2027

(Present)

Higher Secondary Certificate (HSc)

Maharashtra State Board

Percentage: 59%

2021–2022
